Custodial Celestia Staking with Hex Trust

Stake your $TIA tokens securely via our robust staking infrastructure

What is Celestia ($TIA) Staking?

Celestia is a proof-of-stake modular blockchain based on the Cosmos SDK. When delegators stake Celestia ($TIA) to a validator node, they help to secure the network by contributing to transaction validation. In return, delegators receive a share of the staking rewards.

Validator	Hex Technologies
Protocol Rewards*	~15.53%
Validator Fee	10%
Unbonding Period	21 days
Minimum Staking Amount	No
Rewards Compounding	Available upon request

**indicative rate as of 26th February, 2024*

Hex Trust's end-to-end staking infrastructure — from signing of staking transactions to validator nodes — ensures security and integrity throughout the staking process. Designed for institutional use, our proprietary custody platform Hex Safe provides a trusted and reliable platform for deploying $TIA and validate transactions on the network.

Easy $TIA staking in 4 steps:

1. Open a custody account with us
2. Deposit $TIA into your Hex Safe wallet
3. Stake from Hex Safe to Hex Technologies validator
4. Receive rewards regularly and conveniently off-ramp them through our OTC desk

Hex Trust

Why stake $TIA with Hex Trust?

Institutional-Grade Custodial Staking

Safe staking from licensed custody

Staking transactions are signed using a robust and battle-tested custody infrastructure. Staked $TIA remains in custody during delegation periods, taking advantage of bank-grade safekeeping practices, air-gapped wallets, insurance coverage, and robust risk management protocols.

Simplified Staking Experience

Remove complexities and barriers

Hex Trust provides a user-friendly and flexible staking experience. Staking transactions are signed via our proprietary custody platform, Hex Safe. Approvals happen conveniently via our mobile app and signing can happen instantaneously depending on the wallet type.

Reliable Staking Infrastructure

Stake through bank-grade infrastructure built with scalability and resilience in mind

Consistent uptime and availability, near-zero disruptions to the staking process, and 24/7 monitoring. Stake $TIA without worrying about downtime or missed rewards.

Enhanced Security

Stake with peace of mind

By leveraging SOC 2-certified custody architecture, Hex Technologies staking infrastructure benefits from advanced security measures, governance, and controls solidified over years of experience in the institutional digital asset industry.
